

ISO 27001 certificate

Last updated: 29 November 2024

ISO certificate

ISO 27001 is an international standard for managing information security, and a must-have for any organization that is entrusted with large amounts of user data, as we are here at NIPO.

Following an intensive 5-day audit which scrutinized both our Amsterdam and Madrid offices, we are pleased to share the news that NIPO's ISO 27001:2013 certification has once again been extended. Performed by SGS, this audit was fully focused on NIPO's ISMS.

NIPO has been certified to ISO 27001:2013 since 2016. We have retained this by undergoing re-certification audits every three years, along with two additional annual surveillance audits in between.

Continuous improvement is at the heart of both the ISO 27001 certification and NIPO. In line with this, we are now working on all the measures necessary to conform to the latest iteration, ISO 27001:2022, before October 2025.

Alongside ISO certification, we also implement many additional security measures to ensure every Nfield customer can use our market research platform with confidence.

The validity of the ISO certificate can be checked here:
