

ISO 27001 certificate

Last updated: 18 July 2025

ISO certificate

ISO 27001 is an international standard for managing information security, and a must-have for any organization that is entrusted with large amounts of user data, as we are here at NIPO.

Since Nfield's inception in 2011, security and compliance have been core pillars of our platform. We secured our first ISO 27001 certification back in 2013, followed by rigorous annual audits.

We're thrilled to announce that SGS has confirmed our successful transition to the latest ISO 27001:2022 standard! This achievement is not just a milestone for NIPO; it directly benefits all Nfield users. We know this certification is increasingly vital for securing new projects, as clients demand assurance that their data is safe and secure. With Nfield, that assurance is guaranteed.

The 2022 standard represents a substantial upgrade from the previous 2013 version. Following last year's audit, our team immediately began preparing for this transition, which included a full re-certification. A massive thank you to the dedicated NIPO ISO Champions team for their fantastic work. Now, our business and our clients can truly benefit!

The validity of the ISO certificate can be checked here:
