

Security assessment statement

Last updated: 28 August 2025

Security assessment statement

This statement is provided to guarantee that Secura, a Bureau Veritas company (<https://www.secura.com>), upon the request of NIPO Software B.V. has conducted the 2025 annual Technical Security Assessment of the Nfield platform.

Secura has been performing these assessments for NIPO Software B.V. since 2012.

Nfield is Kantar's destination platform. Next to wide usage in Kantar, the Nfield platform is also used by many market research companies across the world.

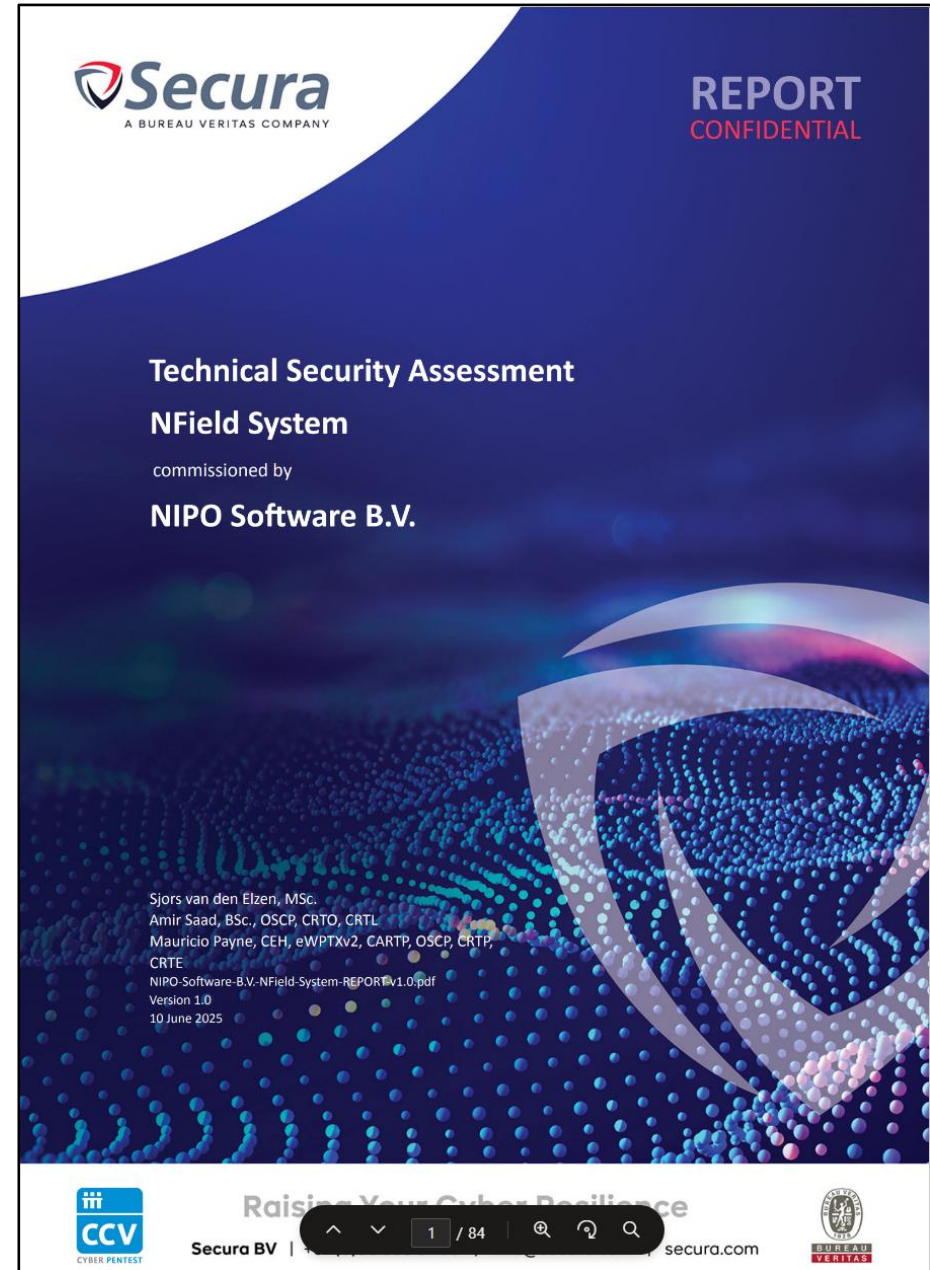

NIPO is a Kantar company. Under current NDA, the Secura reports have been shared with Kantar's Risk Assessment team.

No critical or high risks were identified by Secura.

The security assessment was performed over May and June 2025 in two stages.

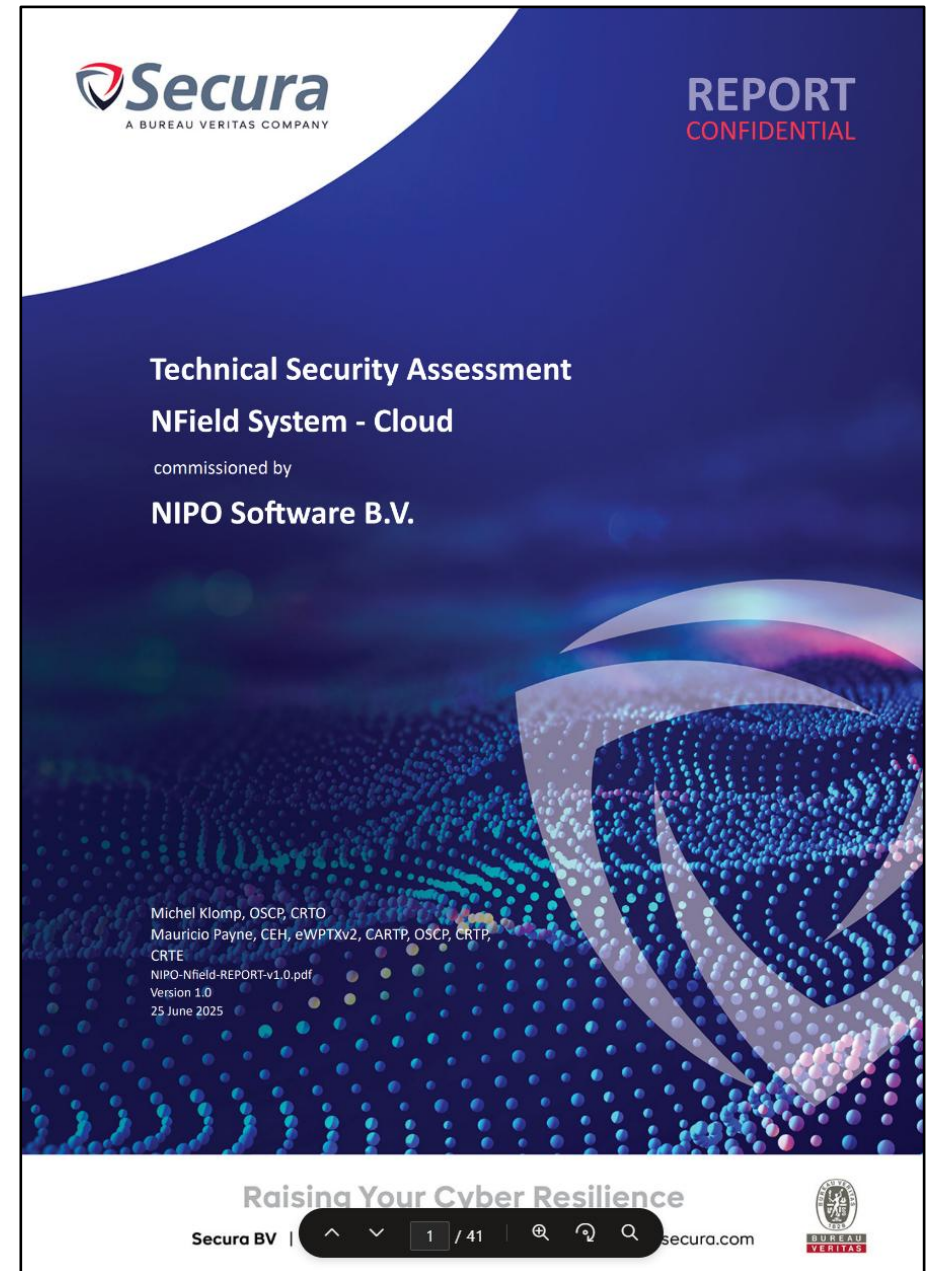

The first stage included a gray box application assessment of both the web and mobile applications and an assessment of the infrastructure of the web application.

Cover sheet of latest first stage security report on the right:

The second stage included a crystal box cloud assessment in which the configuration of the Azure cloud environment for NIPO was verified using the credentials provided by NIPO.
